La collezione Raw trasforma il radiatore in un elemento tridimensionale, vuoto e leggero. L'incrocio dei tubi cita elementi da costruzione come impalcature e tralicci, per dialogare con l'architettura in modo diretto e non convenzionale.

La collection Raw transforme le radiateur en un élément tridimensionnel, vide et léger. Le croisement des tubes fait référence à des éléments de construction tels que les échafaudages et les poutres, pour dialoguer avec l'architecture de manière directe et non conventionnelle.

The Raw collection transforms the radiator into a three-dimensional, hollow and lightweight element. The intersection of the pipes references construction elements such as scaffolding and trusses, interacting with the architecture in a direct and unconventional way.
