CYL Valve with THERMOSTATIC Head

The effect of the quilting, arranged on a network of squares, is transferred to the metal surface of the B'A plate to evoke a fashion that has remained in the history of furniture.

Panels: BREM'ART

PRICE FROM 01.03.2026 +5%

The Brem'Art panels are built with a thickness of only 2,3cm. The valves can be hidden thanks to the higher cover.

The connections behind the cover allow the thermostatic head, partially visible, to operate by detecting the room temperature.

The electric version is produced with heights 180 and 200 cm and a protrusion of only 5.8 cm because of electrical devices.
