

Filu&Ferru.
The name comes from an ancient Sardinian marc distillate.
It is a transparent, strong and generous beverage, deep warmth for tasters and delight for givers. It is family and home intimacy in winter. It is a refreshing and invigorating taste.
I've thought of the name for this Brem radiator because of resonant echoes name "Filo & Ferru" (thread & iron) and for home warmth, hospitality and intimacy.

BREM'ART CREATIONS

The Brem'Art panels are built with a thickness of only 2,3cm. The valves can be hidden thanks to the higher cover.

The connections behind the cover allow the thermostatic head, partially visible, to operate by detecting the room temperature.

The electric version is produced with heights 180 and 200 cm and a protrusion of only 5.8 cm because of electrical devices.
