

PIET 187-45

CYL Valve with THERMOSTATIC Head

The design of this radiator is a tribute to Piet Mondrian and his neoplasticism style, where the artist has manually drawn intersecting vertical and horizontal lines on a material background to create a work of clean geometric rigour.

BREM'ART CREATIONS

Sablé white SB9016 finish, parallelepiped in relief gray and red color.

Other sablé colors Brem without extra

Other Ral colors in the sablé finish only on request.

Technical data B'A Panels page II

Panels: BREM'ART

The Brem'Art panels are built with a thickness of only 2,3cm. The valves can be hidden thanks to the higher cover.

The connections behind the cover allow the thermostatic head, partially visible, to operate by detecting the room temperature.

The electric version is produced with heights 180 and 200 cm and a protrusion of only 5.8 cm because of electrical devices.
