CYL Valve with THERMOSTATIC Head

Light plays and reflects on the irregular surface to create unexpected, ever-changing effects. The colour is an important part of the work.

Each item is carefully crafted by hand, meaning that no two items are ever the same.

The Brem'Art panels are built with a thickness of only 2,3cm. The valves can be hidden thanks to the higher cover.

The connections behind the cover allow the thermostatic head, partially visible, to operate by detecting the room temperature.

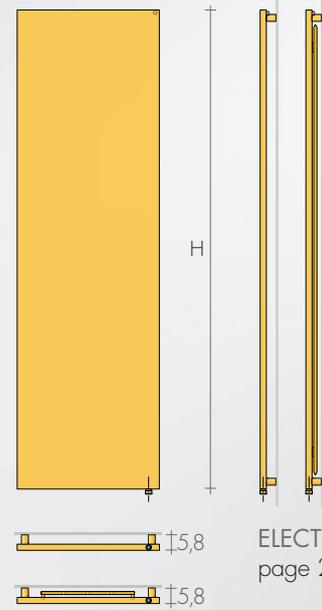

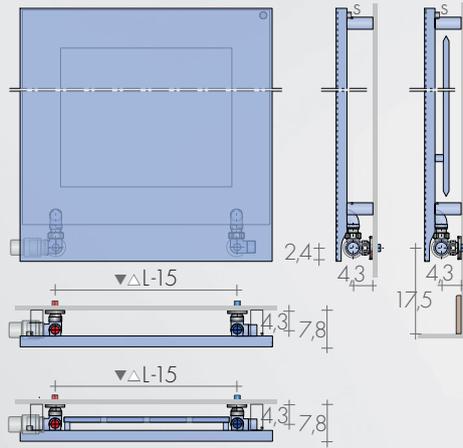

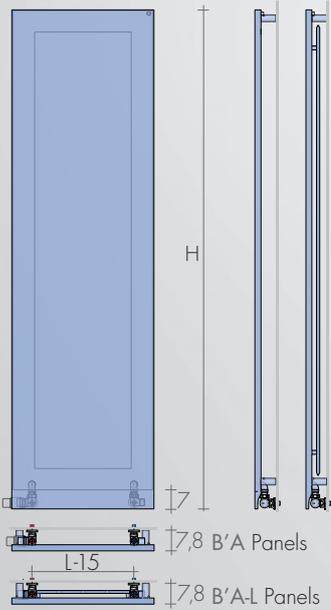

The electric version is produced with heights 180 and 200 cm and a protrusion of only 5.8 cm because of electrical devices.
