FINITURE SPECIALI +35%

- BR 0031 solo per piastre e tubi piatti finitura spazzolata per eliminare le imperfezioni e verniciata trasparente (BR 0007 è la tinta più simile al ferro).
- BR 0021 finitura trasparente gialla lucida, trasmette l'effetto dell'ottone lasciando trasparire le saldature.
- BR 0021-ST finitura trasparente soft-Touch
- BR 0022BL colore ruggine sfumato con finitura lucida (abbinato alla foglia oro nel mod. Eruzione)

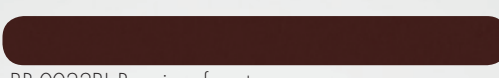

COLORI SEMI-LUCIDI 70 GU

BR 0031 Metallo spazzolato

BR 0021 Simil ottone

BR 0022BL Ruggine sfumato

FINITURE SPECIALI BREM (piastre escluse)
- BR 0001, finitura lucida in metallo trasparente, sul ferro naturale lascia in evidenza tracce di lavorazioni (saldature, rigature, spazzolature, aloni, macchie...); il processo di fosfosgrassaggio esalta il colore dell'acciaio nelle tonalità di grigio, beige, blu, marrone, verdone e rende ogni pezzo diverso da un altro.
- BR 0001 MS, finitura trasparente opaca, trasmette tutta la "brutalità" della materia prima; la finitura lucida, invece, ne ingentilisce l'aspetto. Queste finiture sono espressione di "Arte povera".

COLORI PER L'ARCHITETTURA: COLORI RAL NELLE VARIE FINITURE non inclusi nelle tabelle: +25%, + contributo spese secondo disponibilità e fattibilità
