

An imaginary walk on the uneven surface of the moon, the sensation of overcoming space and gravity for the very first time: this is the message that Steven Cavagna gets across by adding softness to a radiator.

Technical data B'A Panels page II

The Brem'Art panels are built with a thickness of only 2,3cm. The valves can be hidden thanks to the higher cover.

The connections behind the cover allow the thermostatic head, partially visible, to operate by detecting the room temperature.

The electric version is produced with heights 180 and 200 cm and a protrusion of only 5.8 cm because of electrical devices.
